Oil Boiler Experts in London, Westminster , Enfield, Bromley, Kent,Croydon , Essex, Twickenham Uxbridge,Central London (City London), East Central & West Central London, Knightsbridge, Pimlico,
Hammersmith
, Kensington

It is possible to have an oil boiler efficiency of up to 97% - that is, 97% of the oil's thermal energy is converted to heat. In the UK there is a scale rather unimaginatively called SEDBUK: Seasonal Efficiency of Domestic Boilers in the UK, and this defines ranges of boiler efficiency to help you narrow down your options easier. An A-rated boiler is 90% efficiency or greater.

With limited exceptions, all oil-fired boiler installations in the UK need to use a condensing type of boiler. This energy efficient boiler comes in several varieties of drain options:

- Internal stack pipe
- Waste pipe
- External gully or drain
- Rainwater hopper
- Custom-made soak away

Oil boilers can still take different forms, according to the home's plumbing:

- Combination oil boilers
- Regular oil boilers
- System oil boilers

*Advanced Professional Plumbing & Heating Services London offer 24 hours service and all types of boiler repair and installation issues. Our engineers have experiences and qualifications to work on **oil boiler** so if you are one of the people who have oil boilers located in your property and it your oil boiler gives you trouble. You can just give us a call at your convenient as we operate 24 hours a day throughout all festive and holiday periods .*
