Advanced Professional Plumbing & Heating Services London is a family run business (husband and wife) formed who offers Multi-trades service.

We are a GAS SAFE (CORGI) registered, NICLEC certified and fully qualified multi-trade company in London. We have professional gas plumbers with 15 years experience as well as some other trade's specialists. We cover all areas of Central London (City London), East Central & West Central London, City of London and Westminster, West End London (West), Northwest London, East London, North London, Enfield, Southwest London, Southeast London, Bromley & Kent, Croydon, Richmond & Twickenham, Uxbridge, Essex and all surrounding areas

## ***Emergency Hot Water Cylinder, Megaflo Cylinder Repair and Installation***

Choosing the method by which hot water is supplied is often pre-determined by the choice of central heating system; which is ironic as heating systems in the UK are used on average for less than five months of the year. In addition the amount of heating required can be pre-determined, i.e. 18 degrees centigrade in the bedrooms, 21 degrees in the living room and so on.

It is the hot water requirement that tends to vary with usage, yet it is often treated as a lower requirement to, boiler location, ease of installation, cost etc. The issue is often compounded by the variety and choice of water heating systems that are now available, yet in general terms there are only two main types of system:

- Instantaneous water heating which heats water as required
  
- Hot water storage, which stores hot water ready for use

Many would argue that this is an over simplification, and of course there are many derivatives of each. Both hot water systems have different characteristics and some of the key issues for consideration include:

- Type of fuel available
  
- Number and age of occupants in the dwelling

- How much hot water do you need
- Is the water heating system to be a part of the central heating system
- Number of hot water draw off points, bathrooms en-suite etc
- Speed of hot water delivery
- Flow rate requirement
- Space available for hot water appliances
- Suitability of location and technical feasibility, flues etc
- Preference for a dry loft space
- Cost verses benefits
